Conversions Now Available!

S9820 to 9823 OFS

*Garner, NC

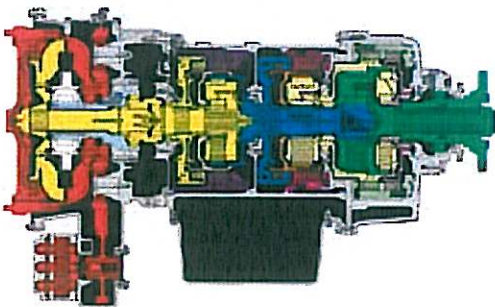

TransAxle's Garner, NC facility is an Allison Authorized maintenance dealer. All of our Allison transmissions are remanufactured in dedicated facilities by factory trained technicians using only genuine Allison components. We have remanufactured exchange Allison transmissions available that will replace and update your S9820 transmission to the latest Allison spec, the 9823 OFS. The latest specification is designed to withstand the toughest oil field operating conditions. The update includes all of the unique 9823 OFS components. TransAxle can also custom remanufacture your unit and convert your old S9820 transmission to the new 9823 OFS transmission. Every Allison Off Highway series transmission is dynamometer tested and comes with a 6 month warranty.

This latest design is tested and proven to endure extreme oilfield pumping applications. These updated transmissions will require some modifications :

- Viscous driveline damper at the pump (TransAxle can supply)
- Driveshaft length
- Brake mounts
- Driveline guards

Visit TransAxle.com to contact your local representative for pricing on remanufactured conversions or custom remanufacturing.

Redesigned To Withstand Oilfield Pumping Applications
